Drilling Core catcher BKF 350

Our new patented solution – DRILLING CORE CATCHER BKF 350

The Drilling Core Catcher BKF 350 is a device that allows the retention of the drill core at the core drilling in concrete ceilings.

- In applications where no supporting is possible or it would be very expensive
- For standard drill bits with 1 ¼ "UNC drill spindle
- For drill bit diameter of 60-350mm
- For ceiling thicknesses up to 35cm
- Easy to use
- Weighs just 2kg
- Slide travel / free size 75cm only
- The additional time you need against the common core drilling is about 5-8 minutes (however you save any complex supports!)

Further information and technical data, refer to the attached manual.
